

## Environmental policy - 2019

Pisler Furniture Rental GmbH is specialized in furniture rental to individuals and companies. Trained surveyors and experienced operatives in accordance with legislation and regulations of Switzerland deliver this service.

We recognise, however, that in our day-to-day operations we inevitably impact on the environment in a number of ways and we wish to minimise the potentially harmful effects of such activity wherever and whenever possible. As a consequence of this, the management is committed to continuous improvements in environment performance and the prevention of pollution.

We will implement our policies in order to help every person to understand and to implement the relevant aspects of this policy in their day-to-day works through regular communication of objectives, action plans and achievements.

The company will use environmentally safe and sustainable energy sources to meet its needs whenever possible. We will invest in improved energy efficiency of products we use, rent and sell.

The company maintains that a primary part of its corporate environmental strategy is sustainable waste management and as such recognises its responsibilities to recycle materials wherever possible.

We will minimise waste, especially hazardous waste, and whenever possible recycle materials. We will dispose of all waste through safe and responsible methods.

We will work with our suppliers to ensure they recognise and reduce the environmental impact of their products and transportation.

We will implement our policies through guidelines and training.

Specific targets where discussed in our last team meeting : Through coordinating route planning this company seeks to realise the dual benefits of reduced fuel consumption and lower exhaust emissions but we also engage in following goals whenever feasible: recycle cardboard, paper, batteries etc.. , use emails instead of regular post, select light oil for heating, regular replacement of the trucks, use of energy saving devices (washing machines, fridge etc...) , use of recyclable paper cups, recycle coffee tabs, resell or donate furniture which are not anymore usable for the rental activity, select local suppliers, use recycled products (paper/cups/), repair furniture rather than dispose of it, avoid softener by washing,

The company will rediscuss the feasibility of small and big improvements with the employees on a regular basis and set environmental targets and goals designed to improve our environmental performance even further than expected by the applicable laws and regulations.

For the management :

Eric Pisler
